Journal of Fluid Mechanics **Volume 361 25 April 1998**

K. Sardi, A. M. K. P. Taylor & J. H. Whitelaw Conditional scalar dissipation statistics in a turbulent counterflow *page* 1

F. J. Higuera & P. D. Weidman Natural convection far downstream of a heat source on a solid 25

N. Sela & I. Goldhirsch Hydrodynamic equations for rapid flows of smooth inelastic spheres, to Burnett order 41

A. Philipp & W. Lauterborn Cavitation erosion by single laser-produced bubbles 75

S. Ramanujan & C. Pozrikidis Deformation of liquid capsules enclosed by elastic membranes in simple shear flow: large deformations and the effect of fluid viscosities 117

R. Andričević & V. Cvetković Relative dispersion for solute flux in aquifers 145

J. W. Miles & P. G. Chamberlain Topographical scattering of gravity waves 175

J. F. Garten, S. Arendt, D. C. Fritts & J. Werne Dynamics of counter-rotating vortex pairs in stratified and sheared environments 189

N. R. McDonald The decay of cyclonic eddies by Rossby wave radiation 237

R. Manasseh, C.-Y. Ching & H. J. S. Fernando The transition from density-driven to wave-dominated isolated flows 253

L. K. Forbes & G. C. Hocking Withdrawal from a two-layer inviscid fluid in a duct 275

A. A. Draad & F. T. M. Nieuwstadt The Earth's rotation and laminar pipe flow 297

J. R. Abbott, A. L. Graham, L. A. Mondy & H. Brenner Dispersion of a ball settling through a quiescent neutrally buoyant suspension 309

S. Eliahou, A. Tumin & I. Wygnanski Laminar–turbulent transition in Poiseulle pipe flow subjected to periodic perturbation emanating from the wall 333
